

About Us

Arbel Energy and Logistics Limited (AE&LL) is a private corporate entity with its Head Office in Abuja, Nigeria. We are an energy and logistics company seeking to provide efficient solutions for the development of unique, sustainable and valuable business ecosystems. Our key objective is to engender rapid wealth creation in Sub-Saharan Africa through the harnessing and optimal application of energy in partnership with leading stakeholders in the sector. We use appropriate means, correct channels and right partners to achieve our set objective at minimal costs. Our guiding core values are Trust, Responsibility, Integrity, Commitment and Excellence (TRICE).

OUR VISION

Be the Fulcrum of Optimal
Utilization of Energy in Sub-
Saharan Africa.

OUR MISSION

Harness and Trade Energy to Meet
Economic and Environmental Objectives.

COMPANY STRATEGY

Our Strategy is to combine our competence in the local business framework with innovative technologies from global industry leaders into a formidable leading corporate entity that delivers exceptional solutions to age-old problems.

OUR ADVANTAGE

- ❖ Industry Penetration
- ❖ Extensive Reach for Business Facilitation
- ❖ Business Progress and Management
- ❖ In-Country Security Management
- ❖ Resource Management
- ❖ Value Delivery Assuredness

General Focus

Given the dire need for energy in developmental thrusts of society, and the corresponding poor harnessing of such abundant energy resources particularly in Sub-Saharan Africa, ARBEL was established to bring innovation to the energy business in the Sub-region. With a relatively pioneering status in the energy sector, our company's focus is in accessing and exploiting the huge opportunities existing therein across the sub-Continent.

With Nigeria as the springboard and flare gas industry as a pioneer, ARBEL identifies with the Nigerian National Petroleum Company Limited (NNPCL) as well as Nigerian Upstream Petroleum Regulatory Commission (NUPRC) to achieve zero gas flaring objective of the Country. Currently, less than 25% level is attained on this set objective and Nigeria remains the second largest gas flaring Country in the world. With an estimated loss rate between 150 and 170 bn m3 of gas worldwide worth about \$30. 6bn annually due to unmitigated gas flaring, Nigeria's potential in Flare Gas Recovery (FGR) and the associated value chain are indeed enormous. Our initial efforts will thus focus on these as well as on renewable energy.

MARGINAL FIELDS

Opportunities still exist in the verticals of traditional hydrocarbon exploration where in Nigeria only 5% of about 178 marginal fields Nigerian Upstream Petroleum Regulatory Commission (NUPRC) are producing. Indigenous firms like ARBEL are preferred uptakers for the fields by government policy, and are expected to collectively contribute at least 100,000 barrels per day to National Crude Oil production. We are uniquely positioned in our field, to significantly address the issues mitigating successful exploitation and higher production rates.

WHERE WE ARE GOING

Our corporate entity will broaden as we create hitherto non existent value chains and business ecosystems in the energy sector. By continuously seeking out rich opportunities that are untapped because they are difficult to exploit, our company plans to be pioneers in these challenging areas from the onset and remain leading innovators throughout our business life cycle. On behalf of our teams, we will identify opportunities, create frameworks for engagement and drive through to production and sales all aspects of project management.
